

# More Security for Granted

Scheuten® Solar Warranty for Multisol® Modules

October 2009

Scheuten Solar understands that PV modules need to be strong & durable to realize maximum output and perform for the lifetime of the system. Multisol® modules are based on sophisticated design and robust construction.

As per 1 October 2009 Scheuten Solar introduced warranty conditions better reflecting the quality delivered with the modules.

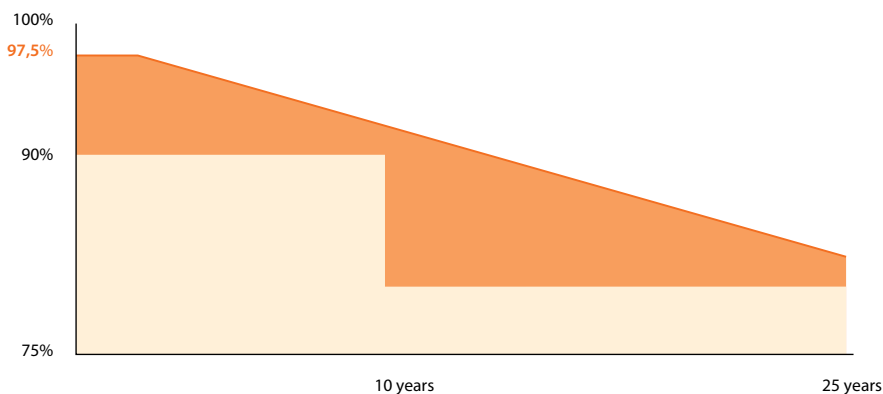

**By these changes Scheuten Solar takes the lead in power output warranties.**

## Product Power Warranty

- 10 years product power warranty

## Product Performance Warranty / Power output warranties

- 97,5% for the first and second year
- Linear reduction till 92% in 10 years
- 83% after 25 years
- This means the output warranties are linear based with a reduction of 0,63% starting the 3rd years until the 25th

- Leading warranty conditions Scheuten Solar
- Industry standard

## Advantage

The bottom line is that customers receive an extended power output commitment which equals about 1.5 years of energy production.

See detailed warranty conditions for further details.
